

WOOD FLOUR

PRODUCT DESCRIPTION

Spanvall Wood Flour is made from pure and extra fine sawdust which has been cleaned and heat-treated. The wood flour is free from toxins and foreign bodies. The moisture content of the shavings is between 8 and 15 percent, which provides for a dry, warm and bacteria-free bedding environment and reduces occurrences of umbilical hernia. Spanvall WOOD FLOUR is especially suitable for use in the farrowing path.

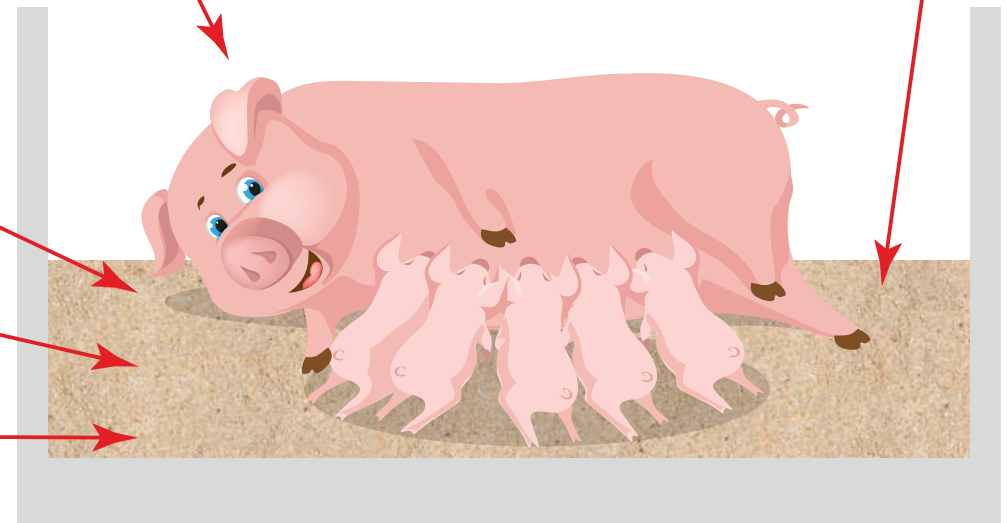

High animal welfare

High absorbency capacity

Approved for use in SPF herds

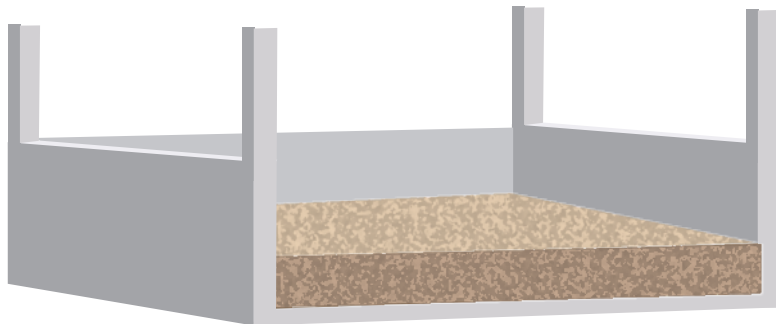

Binds ammonia and moisture

100 % biodegradable

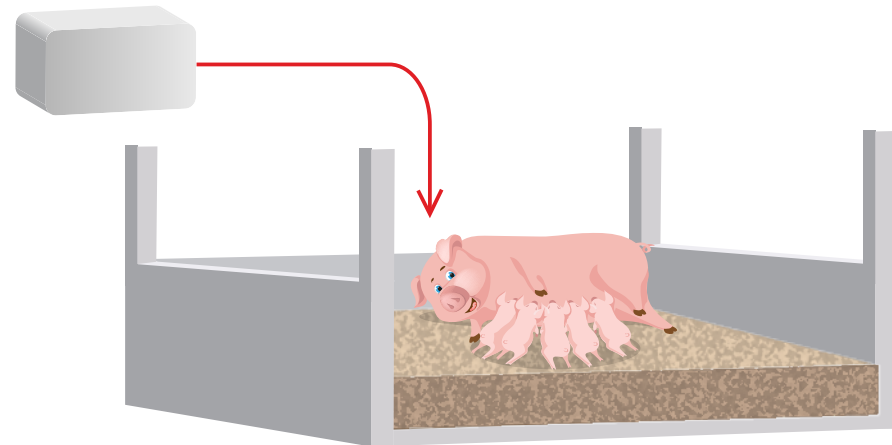

HOW TO USE

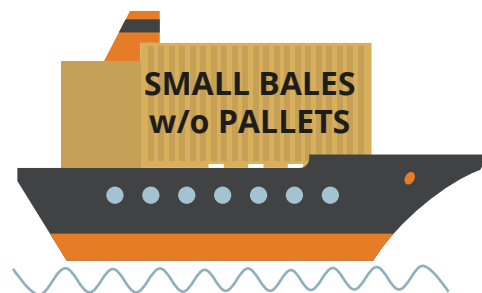

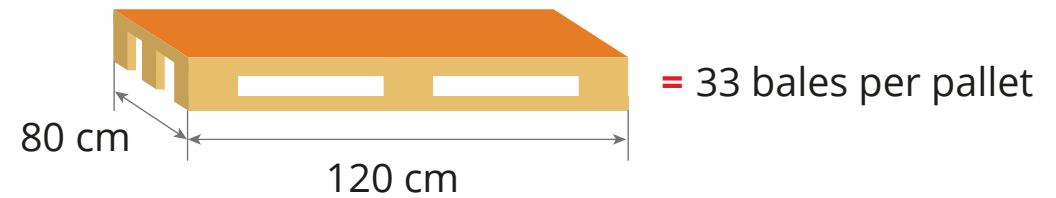

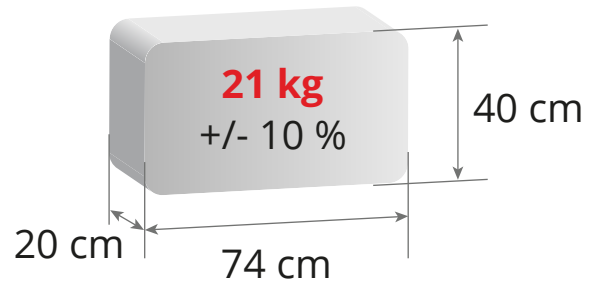

- 1 Spread a couple of handfuls of the bedding in the piglet cave before farrowing

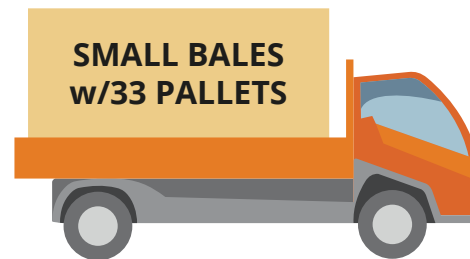

- 2 The dosage for new-born piglets is as desired
