

# XL WOOD SHAVINGS

## PRODUCT DESCRIPTION

XL wood shavings are made of white wood shavings having a large structure of a good quality which have been heat-treated. The shavings have a moisture level of 50-60 % and it contains no toxins or foreign bodies. The bedding has a good moisture absorption thanks to the large flakes. The advantage of using wood shavings with a high moisture level is that the moisture is released within the first 24 hours, which has a beneficial effect on the chicks and the environment in the house. XL wood shavings can be used widely but is especially suitable for broiler.

**100 % biodegradable**

**Heat-treated**
