

SPANVALL MINI SPREADER

PRODUCT DESCRIPTION

Spanvall Mini Spreader is specially designed for Spanvall bedding products for poultry farms.

The spreader is recommended to use products compressed in small bales. No manual work is required when using Spanvall Mini Spreader.

The amount of bedding required is much less when using the spreader. The absorption capacity of bedding is higher/more efficient compared to manual spreading.

Recommended to use in parent farms and broiler farms. And can be used in farms with multiple floors as it is easy to handle.

**No manual work –
Labour and time saving**

**Spread very quickly,
efficiently and
conveniently**

Operates with hydraulic

**Ready with mainmover,
no other technical unit is
required**

HOW TO USE

- 1 Put bedding in the spreading machine

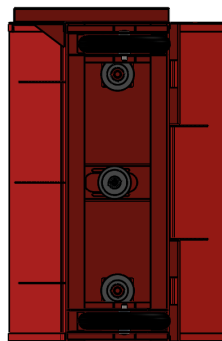

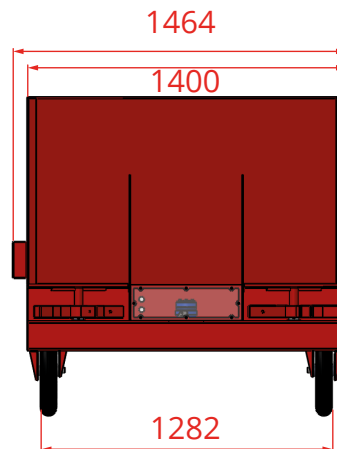

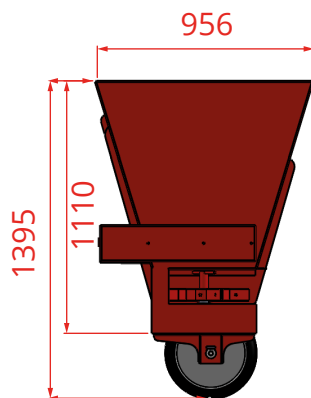

- 2 Spread the bedding

Scan to watch
spreader in action
